

SmartOffice

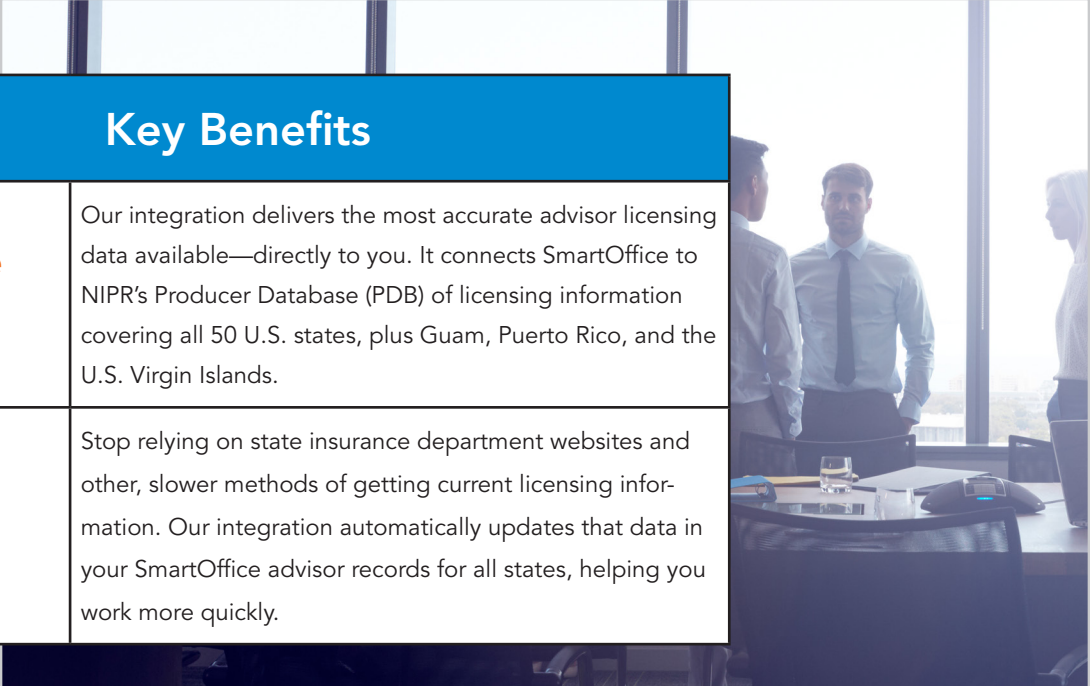

National Insurance Producer Registry Integration

Accurate electronic updates for advisor license information

Having the most up-to-date state licensing information for your advisors is an important part of case management, but it shouldn't slow you down—especially when you're trying to move new business through the pipeline.

What if you could download an advisor's current license status instantly? You can with SmartOffice's National Insurance Producer Registry (NIPR) integration.

Key Benefits	
Reliable data source	Our integration delivers the most accurate advisor licensing data available—directly to you. It connects SmartOffice to NIPR's Producer Database (PDB) of licensing information covering all 50 U.S. states, plus Guam, Puerto Rico, and the U.S. Virgin Islands.
Faster case workflows	Stop relying on state insurance department websites and other, slower methods of getting current licensing information. Our integration automatically updates that data in your SmartOffice advisor records for all states, helping you work more quickly.
